Install or Remove Tutu WMA MP3 Converter

Install Tutu WMA MP3 Converter

1. Download Tutu Audio Converter at http://www.tutusoftware.com/downloads/t-wma-mp3-converter.exe;
2. Double-click the file "t-wma-mp3-converter.exe";
3. Step 1: License Agreement. You should agree the License or the installation will be terminated;

4. Step 2: Choose Destination Folder.

5. Step 3: click "Install" to finish the installation.

Remove Tutu WMA MP3 Converter

You can use "uninstall" in the "start menu" or the installed directory. And you can uninstall the software by "Add/Remove program" in "Control Panel".
Buy and Register software

To buy the software

You can goto our website (http://www.tutusoftware.com) to buy the software, or you can click "Buy" in the menu of "Help". Then you will get the registration code of the software by email.

To register the softeware

CLick "Enter registration code" in the menu of "Help", and then fill the content of "Register Page" (Registration code will be in your email).
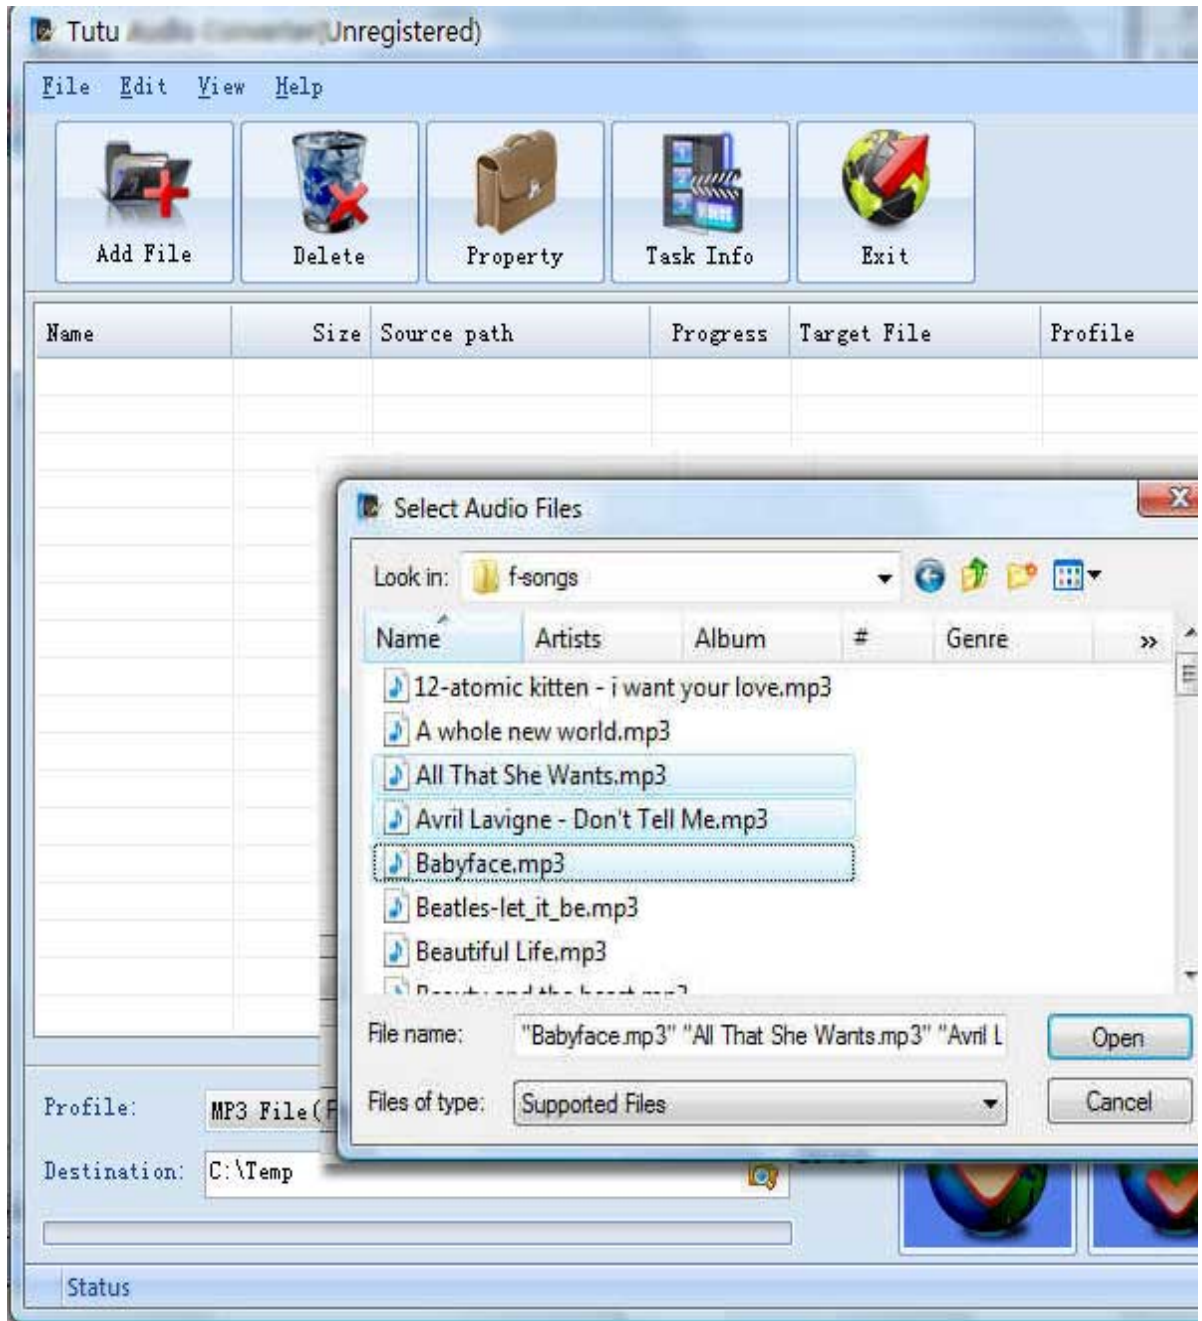

Getting start Converting a Audio file

1. Select the files to be converted;

   There's three ways to add file
   - i. Menu "File" -> "Add file"
   - ii. Toolbar button "Add File"
   - iii. Drag files to the software file list area

2. Delete and Move up/Move down

   To delete a file in the list, just choose the file, click "Delete" button or push the "Delete" key in the keyboard.
   "Move up" and "Move Down" are designed for adjusting the position in the list. The top one will be converted first

3. Output Setting: Profile and Desination

Choose a Profile, that is the format you want to convert, and choose the destination path in "Output" area of the setting see "Adjust Output Quality".
4. Start converting

When all files that to be converted were done configuration, just click "Convert All " to convert all audio files in th Selected" to convert the audio file that was selected, and wait for a while(taken time depends on converted files

Set the start time and stop time

If you want to convert a file just for a snippet, then you will need this function.

Here you can convert just a part of a media file by setting the start time and stop time.

To do this, choose the file in the list, then you can write the start time and stop time in the text area. See sketch map below:
Adjust Output Quality

In the main interface of the software, there's an area named "Output". It's to config the output in three aspects:

1. ## Profile choosing

   You can choose a profile to do the basic output converting config. And all of the video / audio codec parameters is optimized and predigested, the default setting can do good job.

2. ## Video / Audio detail config

   you can do the advanced settings by yourself like video size, bit rate, frame rate, etc. in this section.

   So, you can adjust thesr video / audio parameters by yourself. And every option of these parameters was tested and configed well by us to make all this easy to you.

Set general info of output file

You can select the directory that you want the output files be, and set some general info for the file such as: title, author, time etc.

Destination choosing

Click "Explore" to select the directory that you want the output files be.

NOTE: The output file's main file name is the same to the source file by default. If you repeat converting the same file, in the same directory will create files named by adding suffix 1, 2,3 etc.
